

Powerful but Gentle Bio-Degradable Cleaner

Product Information

PM 1001 Truck Wash is a high-foaming, biodegradable detergent suitable for cleaning all on- and off-road vehicles and equipment. It can be used through a variety of pressure and foaming equipment.

PM 1001 Truck Wash contains a unique mixture of powerful surfactants, alcohols, aromatic chemicals and water softeners.

PM 1001 Truck Wash contains no masking agents. The formulation is designed to remove all grease, oil, and road grime with minimal operator effort. Machinery can be degreased and cleaned more efficiently because the Wash is supplied as a ready-to-use liquid, requiring no additional preparation.

Many wash compositions on the market today rely on reactions between highly hazardous chemicals, such as white spirit, kerosene, or hydrocarbons, to achieve cleaning. These products are **NOT** present in PM 1001 Truck Wash.

Application and Directions for Use

PM1001Truck Wash is a ready-to-use solution.

Direct Application:

Spray directly onto a cool machine or vehicle (out of direct sunlight) using a degreasing/foam-generating gun or hose.

Indirect Application:

Apply the solution through a discharge outlet on a pressure cleaner. (A 1:10 mix ratio is recommended). Allow to stand for 5-8 minutes before washing off with a hose or pressure cleaner.

Conformity:

PM 1001 Truck Wash conforms to the Australian Government's biodegradability regulations and presents no pollution hazard should it be accidentally spilled.

Why PM Lubrication?

- ❖ Premium Quality
- ❖ XPR Protection Reserve
- ❖ Cost Effective Lubrication
- ❖ On-Site Monitoring will maximise equipment life
- ❖ Knife Edge Filtration
- ❖ Premium Quality
- ❖ XPR Protection Reserve
- ❖ Cost Effective Lubrication

Available in 20L, 5L, 4 x 5L Containers
