

Power You Can Feel Protection You Can Trust

Product Information

PM208 Power On Trax 4T is an advanced premium semi-synthetic motorcycle engine oil designed for the latest requirements of 4-stroke motorcycle engines. Engineered utilising the latest additive technology, PM208 Power On Trax brings with it superior engine wear protection while not compromising performance improvements that bike riders are looking for with open-air riding. PM208 Power On Trax has been designed to maximise performance for motorcycle engines and provide riders with the excitement they seek. Performance is at the forefront of PM's POWER ON engine oils.

PM208 Power On Trax 4T will sustain high-temperature performance, while not compromising engine cleanliness and can be used in four-stroke road & sports bikes, dirt and enduro needs, ATVs, quad bikes and scooters, including exhaust catalyst protection in applicable models. The formulation produces a fast flow of the lubricant and reduces the power loss to friction to a minimum. Unsurpassed wear protection and high oxidation resistance are features of PM208 Power On Trax 4T when compared to conventional oils. Superior protection is also afforded to engines encountering lower ambient startup temperatures.

PM208 Power On Trax is suitable for all 4-stroke motorcycles, both carburettor and fuel injection, and meets and exceeds the API SP & JASO MA2 Service Classifications.

Both wet and dry clutch systems are catered for and deliver the physical, chemical, and clutch frictional indices which the JASO MA standard requires. It can be used in most engines, including Yamaha, Honda, Kawasaki, Suzuki, Ducati, Aprilia, Cagiva, and Can-Am. Suitable for stationary engines and generators that require this grade and specification.

Typical Properties

SAE Viscosity	15W50	
Kinematic Viscosity		
Viscosity @ 40°C	161.7 cSt	ASTM D445
Viscosity @ 100°C	18.8 cSt	ASTM D445
Pour Point °C	-24 °C	ASTM D97
Flash Point °C	224	ASTM D92
Viscosity Index	131.4	ASTM D2270
TBN, mgKOH/g	7.5	ASTM D2896
Density @ 15° C kg/L	0.881	ASTM D4052

Benefits

- Improves Power
- Superior Combustion
- Friction Optimised
- Superior Acceleration
- Lower Wear Rates
- Piston Scuffing Eliminated
- Increased Reliability

Meets and or Exceeds Service Classifications

- API: SP
- JASO: MA-2

PM208 Power On Trax 4T 15W50
High Performance and Low Wear

Why PM Lubrication?

- ❖ Premium Quality
- ❖ XPR Protection Reserve
- ❖ Cost Effective Lubrication
- ❖ On-Site Monitoring will maximise equipment life
- ❖ Knife Edge Filtration
- ❖ Our Predictive & Preventative Maintenance Programme is **GUARANTEED** to save 15% of your total operating costs

Available in 20L, 5L, 2.5L Containers

Issued 16 February 2026
