

PM306

Transmove VI FE Multifunctional Full Synthetic Automatic Transmission Fluid API: GL-3, GL-4, MT-1

A synthetic automatic transmission fluid for use in a wide range of automatic transmissions

Product Information

PM306 Transmove VI FE Multifunctional Transmission Fluid is engineered for modern automatic transmissions. Formulation integrity fosters a protective environment, enhancing transmission durability. PM306 Transmove VI FE Multifunctional Transmission Fluid also exceeds the JASO-1A performance requirements for most Asian automatic transmissions. PM306 Transmove VI FE Multifunctional Transmission Fluid provides enhanced protection and durability over prolonged service periods.

Advantages: **High-temperature protection, which in turn lowers the oxidation rate. **Low viscosity results in fuel-efficiency gains. **Frictional durability ensures smooth performance. **Recommended for most modern automatic transmissions requiring lower viscosity fluid.

PM Lubrication's **XPR** (Xtra Protection Reserve) has been engineered into this fluid and is an ideal addition to modern automatic transmissions.

Typical Properties

Viscosity	
Viscosity @ 40°C	29.7 cSt
Viscosity @ 100°C	6.4 cSt
Pour Point °C	-44 °C
Flash Point COC °C	200 °C
Viscosity Index	182
Colour	Red
Density @ 15° C kg/L	0.843

Meets and or Exceeds Service Classifications

Benefits

- Reduces Friction
- Improves Power
- Fuel Conservation
- Lower Wear Rates
- Prolonged Service Life
- Exceptional Cleanliness
- Long Drain

PM306 Transmove VI FE Multifunctional

Maximize your machinery life, saving you THOUSANDS

Why PM Lubrication?

- ❖ Premium Quality
- ❖ XPR Protection Reserve
- ❖ Cost Effective Lubrication
- ❖ On-Site Monitoring will maximise equipment life
- ❖ Knife Edge Filtration
- ❖ Our Predictive & Preventative Maintenance Programme is **GUARANTEED** to save 15% of your total operating costs

Available in 200L, 20L, 5L, 4 X 5L Containers

Issued January 2026
