

PM404

RACING 50
SAE 25W60
API: SN/CF ACEA A3/B3, A5/B5

MINERAL BASED HIGH PERFORMANCE ENGINE OIL FOR TRACK AND STREET MACHINES

Product Information

RACING 50 has been formulated to meet the demands placed on a lubricant by modern four-stroke race engines.

RACING 50 has been developed for high-performance engines with high revving applications in the most arduous and demanding conditions. The advantages of using this product : *High VI *Superior film strength *High resistance to oxidation and deposits *Compatibility with all types of seals and coatings *Extended life under race conditions * Extremely shear stable - SSI viscosity modifiers *Superior protection *Improved performance * HRF - High Reliability Factor

RACING 50 is recommended for all prestige and modified high-performance track and street machines. Also suitable for big bore motorcycles such as Harley Davidson and Ducati. Suitable in wet and dry clutch applications.

Fuel Types: Suitable for use with normal, blended ethanol and methanol fuels but not Nitro-Methane.

Note: When using this product with alternative fuels such as methanol, PM recommends changing the oil after every 1 or 2 race meetings. Methanol attracts moisture and will degrade the lubricant with prolonged use.

RACING 50 incorporates PM Lubrication's low wear and friction reduction technology. Minimizes friction and wear, while maximizing power output.

NB: Due to the high zinc anti-wear component in this formulation the engine oil may NOT be suitable for vehicles fitted with Catalytic Converters or other exhaust treatment systems.

Typical Properties:

SAE Viscosity	25W60
Kinematic Viscosity	
Viscosity @ 40°C cSt	248.2
Viscosity @ 100°C cSt	23.1 cSt
TBN	9.31
Pour Point °C	-27
Flash Point COC °	210
Viscosity Index	132
Ash, Sulphated	1.3
Density @15°C	0.884
Zinc	2,400 ppm

Exceeds Service Classifications:

- API: SN/CF
- ACEA A3/B3, A5/B5

PM 404 RACING OIL
...THERE IS NO EQUAL

Benefits:

- Reduces Friction and Wear
- Improves Power
- Engine Reliability
- Anti-Scuff Resistance
- High Anti-Seizure, Anti-Weld
- Restores Power in Older Engines

Why PM Lubrication?

- ★ Premium Quality Lubricants
- ★ XPR Xtra Protection Reserve
- ★ Cost-Effective Lubrication Solutions for all applications

Available in 205L, 20L, 5L Containers
