

## High Performance – Mixed Fleet

### Product Information

PM408 Endurance Lube 25W60 is formulated to meet the rigorous demands of on-road, off-road, and high-performance four-stroke gasoline and diesel engines. PM408 Endurance Lube will restore power and performance in older engines, extending their service life when productive serviceability is threatened by continued use of inferior lubricants. Suitable for naturally aspirated, supercharged and turbocharged, 4,5,6 & 8 cylinder ULP and LPG engines. It can also be used in gearboxes requiring a non-friction modified engine oil. The lubricant is ideally suited for demanding applications where long distances and high reliability are paramount.

PM408 Endurance Lube 25W60 is a commercial variant of the renowned PM404 Racing 50 oil and is suitable for big-bore motorcycle engines, including those from Harley-Davidson and Ducati.

**Fuel Types:** PM408 Endurance Lube 25W60 is compatible with ULP, E10, LPG, and CNG for on & off-road use. It minimises friction and wear while maintaining power output. Sustains oil pressure.

**NB:** Due to the high zinc anti-wear component in this formulation, the engine oil IS NOT suitable for vehicles fitted with Catalytic Converters or other exhaust treatment systems. It IS NOT suitable for diesel engines with DPF.

### Typical Properties

SAE Viscosity	25W60
Kinematic Viscosity	
Viscosity @ 40 °C	243 cSt
Viscosity @ 100 °C	24 cSt
TBN	9.31
Pour Point °C	-27
Flash Point °C	210
Colour	Red
Viscosity Index	123
Ash, Sulphated	0.86%
Density @ 15° C kg/L	0.896
Zinc	2,400 ppm

### Benefits

- Reduces Friction and Wear
- Improves Power
- Engine Reliability
- Anti-Scuff Resistance
- High Anti-Seizure, Anti-Weld
- Restores Power in Older Engines

### Meets and or Exceeds Service Classifications

- API: SG, CD
- Daimler-Benz 226.5
- Ford M2C.153E
- GM 6085M, 6048M
- VW 500, 501.1

### PM408 Endurance Lube 25W60

**A Noted Performer**

### Why PM Lubrication?

- ❖ Premium Quality
- ❖ XPR Protection Reserve
- ❖ Cost Effective Lubrication
- ❖ On-Site Monitoring will maximise equipment life
- ❖ Knife Edge Filtration
- ❖ Our Predictive & Preventative Maintenance Programme is GUARANTEED to save 15% of your Total Operating Costs

Available in 200L, 20L, 5L, 4 x 5L, 4 x 5L Containers

Issued January 2026
