

A Premium Quality Carrier Oil for Insecticides

Product Information

PM500 Backrubber Oil is a premium carrier oil for insecticides registered for back rubber use. It is manufactured from a highly refined, pure base stock using superior additive technology to produce an effective, clean, and safe insecticide carrier for the control of Buffalo Fly, March Fly, and other biting insects.

PM500 Backrubber Oil uses PureBASE base stock, which means it is free of contaminants that may concern regulatory authorities or cause distress to animals. PM 500 Backrubber Oil has unmatched purity compared to similar products.

PM500 Backrubber Oil uses a specialised additive in the formulation.

PM500 Backrubber Oil will not drip off easily, even in high ambient temperatures.

The Difference in purity between Normal Base Oil & PM PureBASE Backrubber Oil

Typical Properties

Viscosity	
Viscosity @ 40°C	100 cSt
Pour Point 0C	-30°C
Colour	Clear
Density @ 15° C kg/L	0.889

Benefits:

- Compatible with all insecticides
- Effective across a wide temperature range
- Has no irritants
- Enables better weigh gains

PM500 Backrubber Oil

Controls Buffalo & March Fly

Available in 1000L, 200L, 20L Containers

Why PM Lubrication?

- ❖ Premium Quality
- ❖ Cost Effective Lubrication
- ❖ XPR Protection Reserve
- ❖ Cost Effective Lubrication
- ❖ On-Site Monitoring will maximise equipment life
- ❖ Knife Edge Filtration
- ❖ Our Predictive & Preventative Maintenance Programme is **GUARANTEED** to save 15% of your Total Operating Costs
