

Product Information

Chain Life has been produced to provide a very tacky bar lube and has been blended to satisfy the stringent demands of the sawmilling industry and commercial chainsaw operators in the timber cutting industry.

Chain Life additives resist fling off and have enhanced extreme pressure properties which results in extended life to the bar and chain.

Chain Life also contains a surface wetting agent that will displace moisture associated with sappy timbers.

Chain Life also has applications across other industries where protection from chain wear is desired.

Typical Properties:

ISO Grade	125
Viscosity @ 40°C	125
Heavy Tacking Agent	

Benefits:

- **Increased chain life**
- **Reduces maintenance costs**
- **Added reliability**

Available in 205L, 20L, 5L Containers
