

### Product Information

Chain & Bar Oil is formulated to provide a tacky bar lube. It is blended to meet the stringent demands of the sawmilling industry and commercial chainsaw operators in the timber-cutting industry.

Chain & Bar Oil additives resist flinging off and enhance extreme-pressure properties, resulting in extended life for the bar and chain.

Chain & Bar Oil also contains a surface wetting agent that displaces moisture from sappy timbers.

Chain & Bar Oil also has applications across other industries where protection from chain wear is desired.

### Typical Properties

ISO Grade	125
Viscosity @ 40°C	125 cSt
Heavy Tacking Agent	

### PM630 Chain & Bar Life

**For Sawmilling Industry & Chainsaw Operators**

### Benefits

- Increased Chain and Bar Life
- Reduces Maintenance Costs
- Added Reliability

### Why PM Lubrication?

- ❖ Premium Quality
- ❖ XPR Protection Reserve
- ❖ Cost Effective Lubrication
- ❖ On-Site Monitoring will maximise equipment life
- ❖ Knife Edge Filtration
- ❖ Our Predictive & Preventative Maintenance Programme is **GUARANTEED** to save 15% of your total operating costs

Available in 200L, 20L, 5L Containers

Issued January 2026
