

# PM900

**FSX**  
**FUEL SYSTEM CONDITIONER**  
Peak Performance Agent

## IMPROVE FUEL ECONOMY WITH EFFICIENCY

### Product Information

PM900 FSX - Diesel engine Original Equipment Manufacturers have long called for optimal performance while adhering to emission compliance within the industry. PM900 FSX has been developed in the wake of the industry's initiatives. A balanced formulation that delivers a cleaning and maintenance capacity in diesel operation both on and off-road.

Maintaining fuel injection systems is of critical importance, as fuel quality ultimately determines the life of an engine. Cleanliness and precise delivery are even more vital with the latest generation power plants. PM900 FSX will bring significant consumer benefits, involving cost savings that can be enjoyed as peak performance is restored and maintained in everyday operations.

PM900 FSX - Fuel Conditioner Extra is a multifunctional diesel treatment, injector cleaner, and cetane improver. Significant fuel efficiencies in late model diesel engines can be gained. Cetane is the measure of the time delay for injection through to ignition with compression ignition in diesel engines. A higher cetane number indicates a shorter ignition delay.

PM900 FSX - Fuel Conditioner Extra totally disperses water and inhibits the algae growth in diesel fuel. Helps control exhaust emissions, produces quieter operation, restores peak performance, reduces diesel knock, and improves cold start. PM900 FSX - Fuel Conditioner Extra meets Cummins L10 injector clean test.

### Benefits:

- Cetane Improver
- Improves Power
- Improved Fuel Economy
- Lower Exhaust Emissions
- Reduces Smoke
- Disperses Water
- Rust Preventative
- Inhibits Metal Corrosion
- Cleans from Tank to Exhaust
- Easier Cold Starts
- Reduces Diesel Knock

### Treatment Rates:

1 to 1,000 ratio or 1mL to 1L of fuel

### Regular Service:

100mL PM900 to 100L of fuel (1:1000)

**PM900 FSX Extra - Fuel System Conditioner brings a new dimension to Diesel Engine operations.**

By restoring the fuel system to its optimum performance (in achieving more complete combustion), reduced fuel consumption & minimized fuel system service costs can be expected.

### Why PM Lubrication?

- ★ Premium Quality
- ★ Cost-Effective Solutions
- ★ DO MORE WITH LESS

Available in 205L, 20L 5L, 1L Containers
